

Job Description

Job Search Criteria:

- Role type: Backend Engineer – Communications Platform
- Tasks:
 - Develop and implement features for communication efficiency and scalability
 - Own the full lifecycle of development, testing, production, and improvements
 - Design scalable and customizable solutions for platform clients
 - Ensure platform security and integrity
 - Perform code reviews following engineering best practices
 - Analyze and optimize system performance using tracking and reporting metrics
- Skills:
 - Golang or Java
 - Microservices architecture (Kafka, event-driven systems)
 - Linux troubleshooting
 - SOLID principles and TDD
 - System design and performance optimization
 - Secure and scalable backend development
- Experience level: 2-3+ years
- Location: Indonesia
- Salary Range: -

Role:

Relevant Experience and Skills:

Experience:

- Developed and optimized backend services, improving system performance
- Worked on event-driven microservices architecture, utilizing Kafka
- Enhanced database queries and resolved system deadlocks
- Led migration projects, including upgrading analytics and API integrations
- Implemented security best practices for API authentication and data access

Skills:

- Golang (primary), Java (familiar)
- Microservices architecture and Kafka
- API design and security (OAuth, JWT)
- Cloud computing (Google Cloud, Kubernetes)
- Linux and database performance optimization
- Test-driven development (TDD) and CI/CD

Company Description:

Gojek, part of the GoTo Group, is Southeast Asia's leading on-demand platform, offering services in transportation, food delivery, logistics, and payments. The Communications

Platform team ensures seamless interactions across chat, calls, SMS, WhatsApp, push notifications, and email, supporting millions of user interactions daily.

Elevator Pitch

As a backend engineer with a strong problem-solving mindset, I specialize in building scalable, high-performance systems using Golang and event-driven microservices. My experience in optimizing database queries, resolving system bottlenecks, and implementing security best practices makes me a strong fit for the Communications Platform team at Gojek. I'm excited about the opportunity to contribute to a platform that handles millions of interactions, ensuring reliable and efficient user communication at scale.
